

The NEW Outdoor MotionViewer®

The best in outdoor video verification just got better

New and improved features:

- Multiple Fresnel lens options
- Enhanced night vision
- Accelerometer tamper
- Input/output (3/1) terminals for integrating 3rd party devices
- VGA day/night video camera
- Doubled wireless transmission speed
- Easy battery change

New possibilities:

- Outdoor perimeter protection with the Vertical Curtain lens
- Pet-immune detection with the Horizontal Curtain lens
- Focused detection to cover a specific area or asset with the Corridor/Beam lens
- Third-party device integration for specialized video verification scenarios

Applications:

- Construction sites, fenced lots
- HVAC, rooftops
- Critical infrastructure
- Copper theft prevention
- Agriculture, solar panels

Externally accessible programming button

New VGA day/night video camera

4 Fresnel lens options plus masking kit for customizable detection, application flexibility, and reducing potential false alarms

4 infrared illuminators for brighter nighttime video, with illumination range at 30' (from device to ground)

One-screw removal of the body for easy battery change; simple install and field maintenance

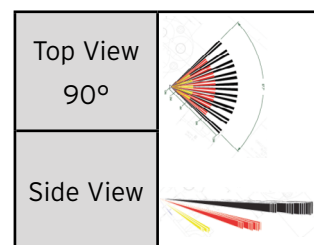

4 LS14500 Lithium AA batteries, longer between changes

Input/output terminals to integrate (and video-verify) 3rd party devices such as panic buttons, doorbells, pressure mats, beam sensors, gate contacts, etc.

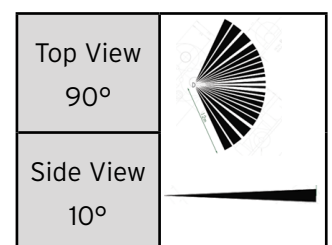

Included lens options:

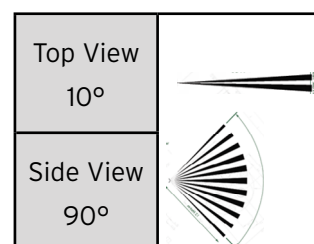

• Standard

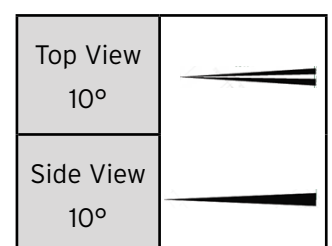

• Horizontal Curtain

• Vertical Curtain

• Corridor/Beam
