

HOW THE VIDEOFIED SYSTEM WORKS

1

Intruder detected by MotionViewer, 7 second video recorded and sent to control panel over military-grade RF

2

Control panel transmits alarm + video over cellular to 24/7 alarm monitoring station

3

Monitoring operator immediately reviews and verifies the alarm + video from the Videofied system

4

Police are dispatched on a high priority level for a verified crime-in-progress

Priced near traditional blind PIRs

Can arm/disarm control panel by:

- keypad
- smartphone app
- remote
- schedule
- existing burglar alarm panel

Can also communicate over Ethernet alone or Ethernet with cell backup to save on monthly cellular cost

No more false alarm fines or false calls to the property
